

Quarterly review of recently published posts on the Quantum Mind site

The last three months have seen a wide range of neuroscience-related blogs, including pieces on the mathematical modelling of brain processes, research into how the brain chooses between options and discussion of problems with the Libet-based disproof of freewill. In respect of quantum biology, we have discussed a recent paper on how evolution may have selected for biomolecules with special electrical conductivity properties.

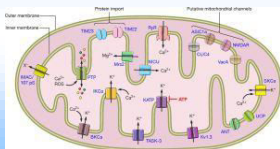

Blog posts August - October 2015 are provided below linked direct to the post/article on the Quantum Mind website.

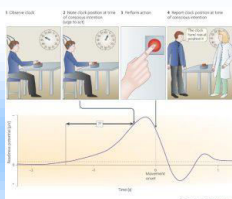

[The brain's attention networks](#) - August 2nd

[Dynamic causal modelling of brain processes](#) - August 10th

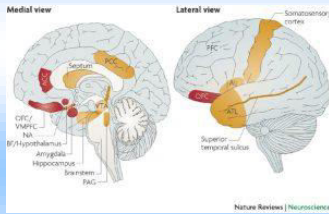

[Mitochondria](#) - August 13th

[Libet v neuroscience on freewill](#) - August 17th
